

Pittsburgh Corning is the world's leading producer of cellular glass insulation.

The roots of Pittsburgh Corning go way back to the 1930's in the United States.

Two American companies, Pittsburgh Plate Glass Company and Corning Glass Works, both leading companies in the American glass industry, founded Corning Corporation in 1937. During the following decades, the industrial group acquired an immense know-how and an extraordinary expertise in the industrial usage of glass as an insulation.

In 1962, a business was founded in Europe, and a production unit was constructed on the Belgium company site. Nowadays, Pittsburgh Corning Europe is represented in all major European countries and actually employs about 450 people.

FOAMGLAS® cellular glass is the future of thermal insulation product with outstanding ecological and economic characteristics that are really needed in the future of building engineering.

FOAMGLAS® large range of products provides insulation solutions for the whole building envelope, from roofs to floors, and from underground constructions to façades.

FOAMGLAS® products are manufactured in the production facilities of Tessenderlo (Belgium) and Klášterec (Czech Republic).

We offer a wide service for Building projects which includes sales and technical support, design and on-site technical training.
