

Saint-Gobain designs, manufactures and distributes materials and solutions which are key ingredients in the wellbeing of each of us and the future of all. They can be found everywhere in our living places and our daily life: in buildings, transportation, infrastructure and in many industrial applications. They provide comfort, performance and safety while addressing the challenges of sustainable construction, resource efficiency and climate change.

- **world leader in habitat**
- **€39.6 billion sales in 2015**
- **operates in 66 countries**
- **more than 170,000 employees**

Founded in France in **1665**, Saint-Gobain is today one of the 100 leading industrial Groups in the world. It pursues its path of technical development through several partnerships with the most prestigious universities and laboratories in the world.

Putting this commitment to innovation into figures, 25% of the products offered by Saint-Gobain did not exist 5 years ago.

Saint-Gobain puts itself on the Italian market as a reference technology center via a modern approach to the building market: flat glass, dry construction systems, alloy ducts, insulating materials, technical mortars, adhesives and plasters, acoustic false ceilings and wall panels, tools for cutting and removing materials. A complete range of solutions offered by the Group for: roofs, cladding, flooring and false ceilings, shells and walls, infrastructures and ducting.

Saint-Gobain arrived to Italy in 1889, and was the first float wave of the Group for flat glass production in the world.

Today:

- **more than 2.200 employees**
- **23 plants**

Saint-Gobain ISOVER

It is a Saint-Gobain Group's brand that identifies the **thermal and acoustic insulation** all over the world.

ISOVER manufactures and markets insulation for the building (walls, floors, roofs, pipes), for industry and transport. It offers a complete range of solutions for thermal and acoustic insulation made of **glass wool, rock wool, ULTIMATE**, expanded polystyrene (**EPS**), extruded polystyrene (**XPS**), **PIR** and **wood fiber**.

ISOVER plant is based in the northern part of Italy, in Vidalengo di Caravaggio (BG). It is completely dedicated to **glass wool** production, and it is the first in the world able to produce ISOVER 4+ glass wool.

ISOVER is also included among the leading producers of **bitumen-polymer membranes**, produced in the plant based in Chieti, and marketed under the brand **BITUVER**.
