

Description:

Clais is a powder product belonging to the chemical family of sulfonated aluminum and sodium silicates combined with crystalline particles, alkali and UV radiation resistant. Designed to color mortars or concretes with cement or lime binders. Incorporating Clais as coloring, does not diminish the strength feature of the mortar or concrete which is added.

Uses:

Clais is used for architectural concretes, for concrete or mortar precast pieces, cobbles, pavements, facade mortars, mortars for grouting brick or stone (natural or synthetic), etc.

Technical features:

Colour/s

blue, black, ocre,
salmon, white, red,
green and brown

Features & benefits:

* EXCELLENT TINTING CAPACITY * WEATHER AND LIGHT
RESISTANT PIGMENTS * WIDE ESTHETICAL
POSSIBILITIES *

Surface preparation:

Not applicable.

Clean up:

While fresh, with plentiful clean water.

Coverage:

White cement 3 to 7%; Grey cement 5 to 12%.

Application

- CLAIS is added to the mixing water followed by cement and sand.
- The recommended doses are: with grey cement the proportion is 3-12% in terms of cement weight whereas with white cement the proportion is 1-3% also according to cement weight.
- It is recommended to test a sample so as to determine the coloration and ensure that the desired colour is obtained.
- It is advisable not to exceed 15% the weight of cement.
- In the final coloration, the sand colour, cement colour, etc must match. It is recommended to test a sample prior to each required dosage of the product.

Packaging:

Available in packs of:

Basic Yellow

0,4 Kilos 8 Packages per box

Black

0,8 Kilos 8 Packages per box

Brown

0,6 Kilos 8 Packages per box

Green NG

0,7 Kilos 8 Packages per box

Ocre Yellow

0,5 Kilos 8 Packages per box

Salmon
