## I. About Isolgomma

Ever since its foundation in 1972, **Isolgomma** has been developing products and solutions for acoustic and thermal-acoustic insulation geared towards improving the quality of life. Constantly evolving product ranges and strong emphasis on comfort and environmental awareness have led Isolgomma to expand into the railway and industrial sectors, with solutions dedicated to vibration damping.

Nowadays, Isolgomma has an established reputation in the Italian and international markets for the development of eco-sustainable solutions. The use of advanced technologies and growing industrialisation of its production processes enable Isolgomma to manufacture products made of recycled rubber granules and fiber boasting unique technical and acoustic features that are protected by international patents.

In the subsequent years, the company became increasingly specialized in the creation of innovative systems for vibration
